

GeoSnap Photo Inventory Tool

Simplifying GIS photo capture with recreational GPS!

We all know a picture is worth a thousand words. But link that

picture to its location and navigation route on a map and you have a powerful visual tool with countless uses. Unfortunately, the complexity and cost has made this prohibitive – until now.

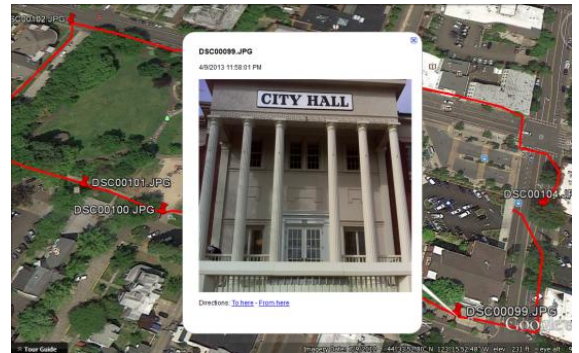

GeoSnap Photo Applications:

- Invasive species spotting
- Asset inspection
- Community Studies
- Parks/Trail Mapping
- Education
- Pre-mission scouting
- Great for volunteer efforts requiring minimal training!
- Use with ArcGIS or Google Earth!

GeoMobile's GeoSnap Photo Inventory solution combines the simplicity and economy of a recreational GPS/camera system with the power of GIS and mapping.

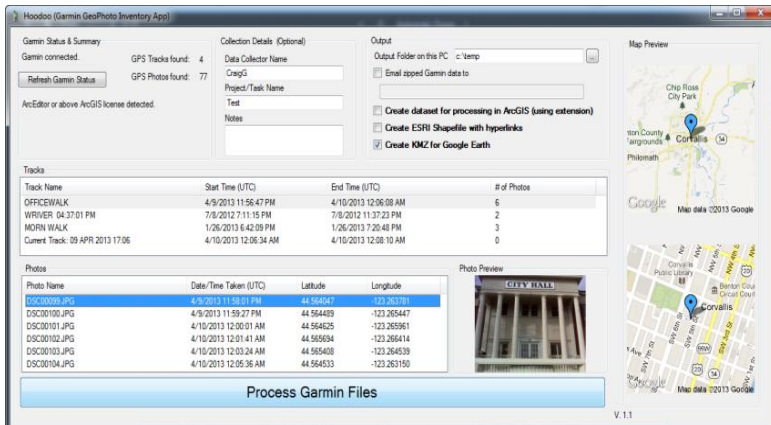

Designed to be used with minimal training, you can quickly mobilize your staff or community volunteer force to capture geo-referenced photos (and associated routes).

Then, let the GeoMobile GeoSnap Photo Inventory tool automatically feed all of this rich visual photo data to ArcGIS or Google Earth!

Purchase the GeoSnap Pak Photo Inventory Solution - \$499.00

- Includes a Garmin Oregon 650 GPS with 8 MP camera
- GeoSnap Photo Inventory software solution
- Different GPS? – Contact GeoMobile Innovations for other compatible models and cost!
